CHAIR SAFETY TIPS

Common sense guidelines to ensure that your Global chair will provide many years of comfort and service in a safe and productive environment:

- Always read and follow assembly instructions. Make sure that all of the pieces of your Global chair are installed in the proper order to ensure structural integrity.
- Ensure that chair casters are fully inserted into the base of the unit.
- Inspect your chair for loose or worn parts at least once a year.
- Always keep the base of your chair completely on the floor.
- Most Global chairs are equipped with casters for use on carpeted surfaces. Other flooring surfaces may require different casters.
- Speak to your Global Sales Representative or refer to the Casters Section of this Price Book for appropriate custom selections.
- Many Global office chairs are equipped with tilt tension controls on the seating mechanism. The tension control compensates for different body weights and postures. Always ensure that the control is properly adjusted for a smooth and controlled tilt motion. Your Global Sales Representative can demonstrate the proper use of all the adjustments on your office chair.
- Do not stand on your Global chair or sit on the arms of your chair.
- Do not put electrical appliances on chairs. Even fire retardant fabrics can be damaged when exposed to direct heat or flame.
- Choose the right chair for your work environment. Global offers a full line of Intensive Use, Multi-Shift and Specialized chairs for environments with demanding health or safety requirements. Your Global Sales Representative is trained to help you make the right choice for your workplace.
