RETURN-SURFACES

Return-surfaces can be used to create meeting surfaces that are perpendicular to a given surface. They are always connected to another surface with mounting brackets (included). Modular modesty panels with steel ties have been designed for use with them. Refer to page 17.

Return-surfaces
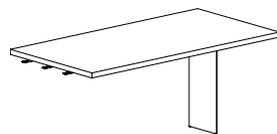

Flush plates
1 long leg - metal

Possible configurations:
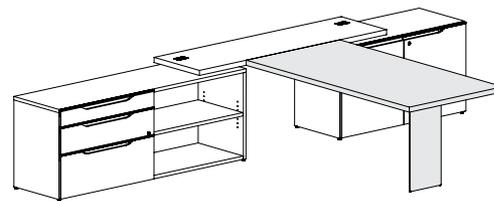

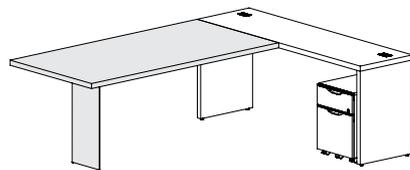

Unauthorized configurations:
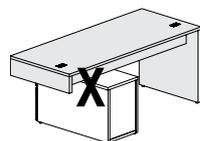

The short leg must always be placed on top of the storage module.
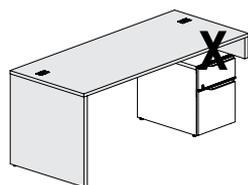

The storage module depth must be equal or greater than that of the surface.
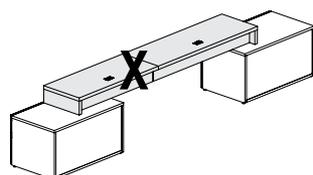

The junction between a surface and a return must lie along a low storage module.
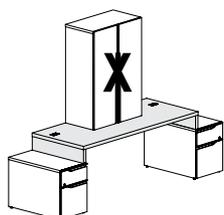

Stackables must be placed above solid structures such as desk legs or storage modules.

Non-recommended configurations:
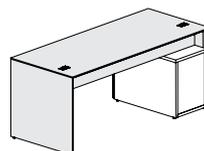

It is recommended that a storage module be positioned beneath a surface and with a recess of approximately 2" (51 mm) when the surface and its legs have knife edgebanding.
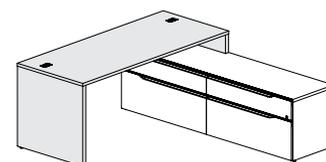

Stacking certain pieces of furniture may render their drawers partially or completely inaccessible beneath the surface. It is preferable to choose a different storage configuration.
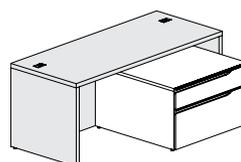

A careful selection of furniture depths helps avoid a situation where the storage module exceeds the surface depth.

WORK SURFACES WITH STRUT(S)

General characteristics
Elevated surfaces have 1" or 1½" (25 or 38 mm) thick, factory-installed laminate struts that come in a matching finish. These surfaces must be installed on 27" H (690 mm) storage modules with double-sided tape.

Elevated surfaces can accommodate modular privacy screens and modesty panels specially designed for use with them. Refer to the price list.

Positioning of struts
A strut may be positioned anywhere along one or two 27" H (690 mm) storage module(s). It is important to make sure that all of its surface is in contact with the storage module(s).

Non-recommended configurations:

27" H (690 mm) storage module

Not valid: The strut exceeds the storage module.
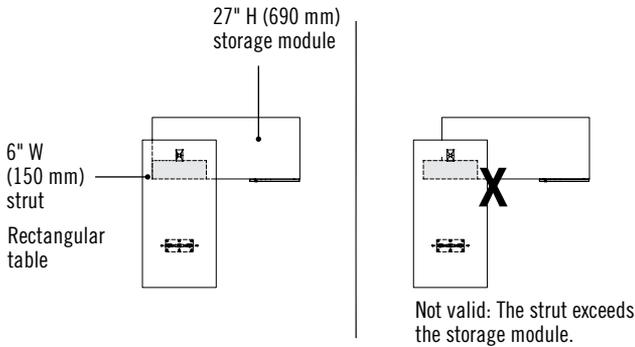

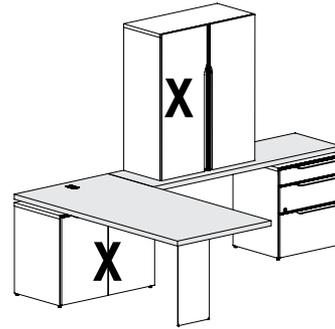

- Shelves must be placed on top of solid structures.
- No raised surface above a storage module with a door.

MEDIA PANELS

General characteristics
Media panels enable the integration of a flat screen into a work station and the set-up of collaborative spaces and work rooms. Media panels are 7" (185 mm) deep and are placed on top of 21" or 27" H (561 or 690 mm) storage modules or 29½" H (752 mm) tables. They are delivered pre-assembled and are installed using double-sided tape and metal fasteners (included). The fasteners are attached beneath a storage module or the laminate leg of a table.

Front panel

7" D (185 mm)

21" H (561 mm) storage module
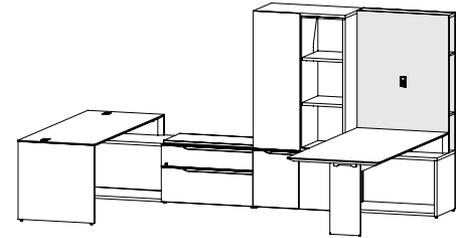

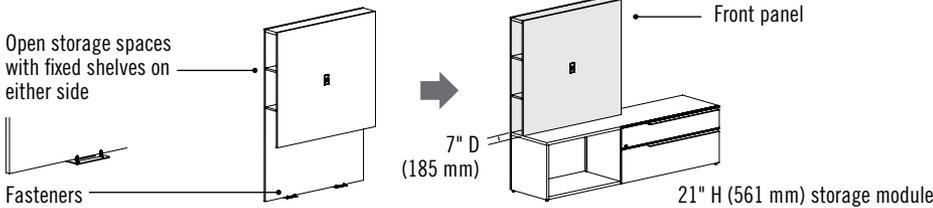

Flat-screen support and cable management
The front panel is designed to accommodate a support for a non-articulated flat screen. The installation area for such a support is solidified and its width varies according to the dimensions of the media panel. Check the width corresponding to the dimensions of the media panel selected before choosing your flat-screen support.

Wires pass through from top to bottom, left to right and front to back thanks to numerous grommets. Depending on the configuration and components of the work station and according to the electronic devices used, additional holes may need to be drilled for the passing of wires (on top or at back of the storage module) during installation.

1 grommet on each internal division

Additional holes may need to be drilled on top or at back of the media panel during installation.
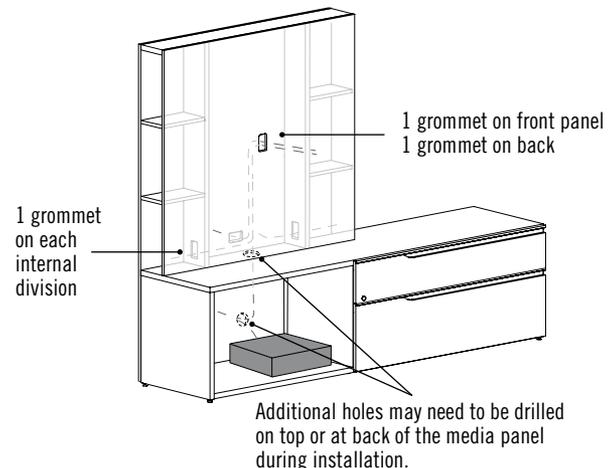

MEDIA PANELS (cont'd)

(W) Width of the fastening strip:
Media panel 48" W (1200 mm) = 24" W (610 mm)
Media panel 42" W (1050 mm) = 18" W (460 mm)
Media panel 36" W (900 mm) = 12" W (310 mm)

(H) Vertical clearance:
The height of the media panel minus the height of the furniture accommodating it.

Possible configurations:
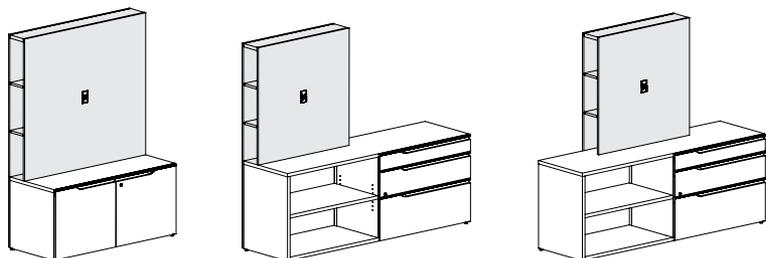

The media panel is installed on top of a 21" or 27" H (561 or 690 mm) storage module of the same width or wider. Modules with drawers do not allow the passage of wires.

Unauthorized configurations:
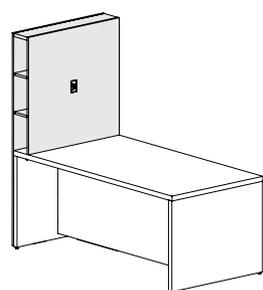

The media panel is installed on a 29½" H (752 mm) table or work surface of the same size and only on the laminate leg.
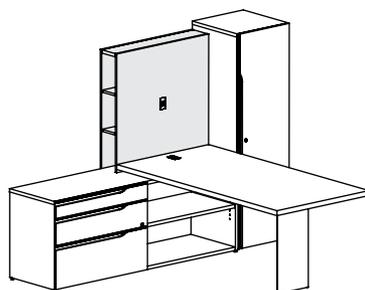

A 21" or 27" H (561 or 690 mm) storage module with media panel can accommodate a surface placed on it directly or raised with a strut.
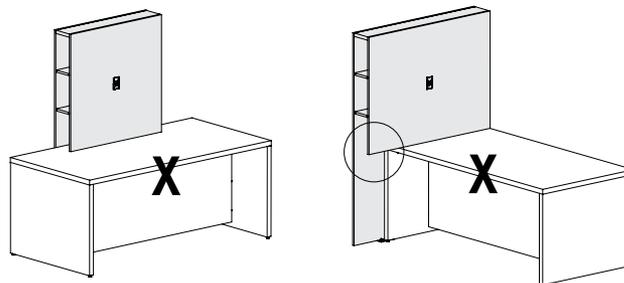

MODULAR PRIVACY SCREENS
