MODULAR ELECTRIC SYSTEMS

HOW TO ORDER:

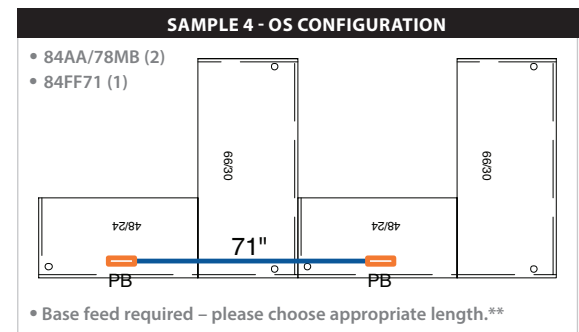

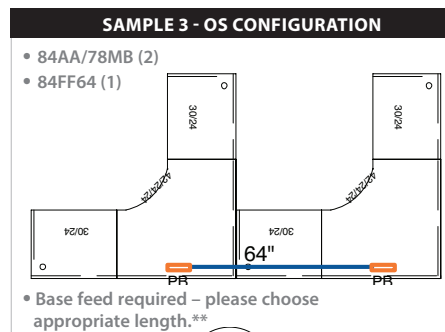

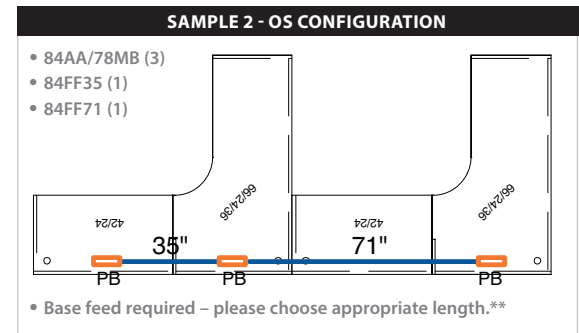

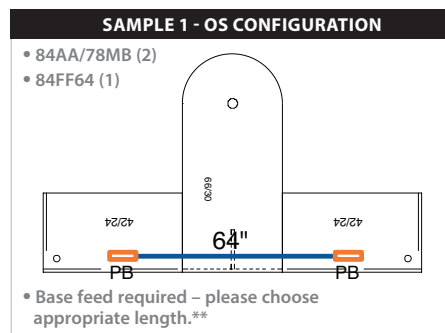

1. Determine the configurations that need powered and electrical load requirements.
2. Choose **Base Feed**.**
3. Establish placement of **Power Blocks**.
4. Identify **Receptacles** per power block.
5. To figure harness length, take the center of the item, where the power blocks are to be placed, plus the length of any items the harness needs to pass under. Subtract 7" and use the next larger size harness, unless measurement is exactly the size of a harness.

For Example:

Sample #1- The power blocks are centered in the 42" returns, so half the return size is 21" for each return (21" + 21") plus 30" depth of the peninsula, minus 7".

$$(21" + 21" + 30" - 7" = 65" \text{ harness length})$$

6. Determine needed accessories.

METAL J CHANNEL

For mounting power and data to the underside of a table or to a modesty panel. They are modular and versatile and provide power, data and wire management in a single package. J-Channels can be outfitted with our Electri-Pak wiring systems including our 8 wire, 3 circuit or 8 wire, and 4 circuit systems. Configurations are available in a variety of lengths and can accommodate a wide range of power receptacles in both single circuit and multi-circuit configurations.

A separate channel is provided for housing the telecom plate and keeps the data wires separated from the power cables. Interconnecting cables and power in-feeds are available in a variety of lengths. Power feeds, interconnecting cables and telecom plates are purchased separately.
